

FINANCE SALES ANALYTICS DASHBOARD

Excel | Power BI | Tableau | MySQL

Presented By : **Thanu Priya S K**

Introduction

The Financial Sales Analytics Dashboard is designed to analyze and visualize sales performance using financial data. This dashboard provides key insights into total sales, profit, units sold, and sales trends across different countries, products, and customer segments. By using tools such as Excel, Power BI, Tableau, and MySQL, the dashboard helps users monitor business performance, identify profitable areas, and make data-driven decisions effectively. The interactive visualizations enable quick analysis of financial metrics and support better strategic planning.

DATA CLEANING & PREPROCESSING

Challenges

- Missing values were found in some sales and profit records.
- Duplicate entries affected data accuracy and consistency.

Steps Taken

- Removed duplicate records from the dataset.
- Handled missing values using appropriate data cleaning techniques.
- Standardized date formats and corrected data types.

Outcome

- The dataset became clean, accurate, and ready for reliable analysis and dashboard creation.

DATA OVERVIEW

Data Source

- Financial Sales Dataset used for sales performance analysis.

Total Records

- Total Records: 700+

Key Variables

- Product
- Country
- Segment
- Sales
- Profit
- Units Sold
- Discount
- Manufacturing Price
- Sale Price
- Date

SALES BY SEGMENT

The Government segment accounts for the largest share of total sales at **44%**, making it the most significant contributor to overall revenue.

Small Business contributes **36%** of total sales, representing the second-largest market segment and a key revenue source.

The Enterprise segment holds **17%** of sales, indicating a moderate contribution to business performance.

Midmarket (**2%**) and Channel Partners (**1%**) contribute a relatively small portion of total sales, suggesting potential areas for market expansion.

Nearly **80%** of total sales come from the Government and Small Business segments combined, highlighting their importance to the company's sales strategy.

SALES BY SEGMENT

- Government segment generated the highest sales, contributing 52.5M, making it the strongest revenue-driving segment.
- Small Business recorded the second-highest sales with 42.4M, showing significant market demand and business growth potential.
- Enterprise segment contributed 19.6M in sales, indicating a moderate but stable performance.
- Midmarket and Channel Partners generated comparatively lower sales, with 2.4M and 1.8M respectively, highlighting opportunities for improvement.
- The sales distribution is heavily concentrated in the Government and Small Business segments, suggesting that these segments are the primary contributors to overall business revenue.

SALES BY SEGMENT

MONTHLY SALES TREND

Key Insights

Sales remained relatively stable from January to August, fluctuating between **5.6M** and **9.5M**, indicating consistent business performance.

A strong upward trend began in September (**10.9M**), showing increased sales momentum during the final quarter of the year.

October recorded the highest monthly sales at **21.7M**, representing a significant peak and the best-performing month.

Although sales declined to **12.7M** in November, they recovered to **17.4M** in December, ending the year on a strong note.

The fourth quarter (October–December) generated the highest sales levels, suggesting seasonal demand and increased customer activity during this period.

DISCOUNT BAND BY PROFIT

The Low Discount band contributes the highest share of profit at **37%**, indicating that lower discounts help maximize profitability.

The Medium Discount band accounts for **33%** of total profit, showing a strong balance between sales volume and profit generation.

The High Discount band contributes **20%** of profit, suggesting that larger discounts may reduce overall profitability.

The No Discount category represents **10%** of profit, indicating that sales without discounts make a smaller contribution to total profit.

Combined, the Low and Medium Discount bands generate **70%** of total profit, highlighting the importance of maintaining moderate discount strategies to optimize business performance.

Benefits of the Financial Performance Dashboard

- Provides a comprehensive overview of sales, profit, costs, and overall business performance in a single view.
- Helps identify top-performing countries, products, and customer segments driving revenue growth.
- Enables tracking of monthly sales trends to detect seasonal patterns and business opportunities.
- Supports profitability analysis by evaluating the impact of different discount levels on profit.
- Facilitates data-driven decision-making through interactive charts, KPIs, and filters.
- Improves business monitoring by highlighting key performance metrics and operational trends.
- Saves time by consolidating large volumes of financial data into easy-to-understand visualizations.
- Assists management in identifying areas for growth, cost optimization, and revenue enhancement.

Conclusion

The Financial Performance Dashboard successfully provides a comprehensive analysis of sales, profitability, products, and business performance. By integrating key metrics such as Total Sales, Total Profit, Units Sold, COGS, and Gross Sales, the dashboard offers a clear view of organizational performance.

The visualizations effectively highlight sales trends, segment performance, country-wise sales distribution, product contributions, and the impact of discount strategies on profit.

Interactive filters enable deeper exploration of data and support informed decision-making. Overall, the dashboard serves as a valuable tool for monitoring financial health, identifying growth opportunities, and driving strategic business decisions.

THANK YOU
